

**UC Sierra Foothill Research and Extension Center
& the CA Rangeland Conservation Coalition present**

**Synthesizing new knowledge on rangeland
ecosystem functions and services**

Thursday, April 13, 2017

8:30 am - 3:00 pm

UC Sierra Foothill Research and Extension Center
8279 Scott Forbes Rd, Browns Valley, CA

This full-day workshop will allow participants to engage in field lectures by research teams that take an in-depth exploration of current research and understanding around five knowledge areas and also allow participants to spend substantial time with researchers to discuss site specific management issues and opportunities.

Key knowledge themes include:

- Microbial and environmental processes driving soil C storage
- The future of niche and value added markets in grazed systems
- Economic impacts and management of medusahead
- Genetic structure, drought impacts and function of California white oak
- Oak woodland hydrology and preferential flow pathways

Limited to the first 60 registrants, due to field lecture capacity

\$30 Registration fee (inc. lunch), must be submitted at
